

## TG-Style Tools

Some of the most common products manufactured for networking projects are connectors – mainly jacks and plugs. Each module is 100% factory tested for continuity. TG-Style termination eliminates the need for a punchdown termination tool. Each jack is individually serialized for traceability and is compatible with Mini-Com® Modular Patch Panels and Faceplates. Select connectors are offered in bulk packages of 10, 24, and 100 unit packs for faster installation and to reduce single-use plastic.

## Panduit TG-Style Termination Tool Guide

EGPT Tool	Category 6A	Category 6	Category 5e
<b>Unshielded angled up/down field term plug:</b>	FPUD6X88MTG	–	–
